Email: kp5336464@gmail.com
Mobile: +91-9356258692

Skills

Languages:	C++, C, Python
Frontend:	Next.js,React.js,HTML5,CSS3
Backend:	Node.js, Express.js, RESTful APIs, Authentication(JWT), WebRTC, socket.io
Databases:	MongoDB, MySQL
Tools/Platforms:	Git, GitHub, Postman, Vercel, GitHub Pages, Render, Thunder Client
Soft Skills:	Analytical Thinking, Collaboration, Ownership

Projects

Voxa – Real Time Collaborative Workspace: Link — Jan' 26

- Engineered a full-stack , real time collaborative platform featuring an infinite whiteboard (**Fabric.js**), a live code editor (Monaco) and integrated P2P voice communication.
- Implemented **sub-50ms** state synchronization across clients using WebSockets (Socket.IO) with custom render throttling to **prevent UI lag** on slow network connections.
- **Optimized** frontend performance by decoupling heavy canvas state from standard React component state, eliminating unnecessary re-renders during **high-frequency** drawing event.
- Built a secure **REST API** and WebRTC signaling server with Express and Node.js, featuring resilient Google OAuth and JWT-based authentication for persistent workspaces in MongoDB
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Google OAuth, Google Cloud, WebRTC

Memory Viz – Virtual Memory Simulation: Link — May' 25

- Accepts user-defined parameters to dynamically execute and visualize the Virtual-to-Physical address Translation process.
- Bridges the gap between abstract **OS** concepts and practical understanding, serving as a powerful demonstration of **system-level** programming, **data visualization**, and educational tool.
- Features modules that graphically demonstrate and compare key memory management techniques: Paging, Segmentation and Combined Scheme.
- Tech Stack: React.js, Next.js, MongoDB, Express.js, D3.js**.**

Training

Data Structure and Algorithm by SkillStone: Link — Jun' 25 – Aug' 25

- Completed hands-on training in logic building and data structures and algorithms using C++.
- Worked with arrays, linked lists,stacks,queues,and sorting/searching algorithms efficiently.
- Anazlyed time and space complexities of different algorithms for performance optimization.
- Applied algorithms to real-world scenarios with emphasis on designing efficient solutions.

Certificates

- Introduction to Hardware and Software Systems by IBM| Certificate — Oct' 24
- The Bits and Bytes of Computer Networking | Certificate — Sep' 24

Achievements

- Solved 500+ DSA problems on competitive coding platform across LeetCode, CodeForces and GFG, strengthening problem solving skills.
- Maintain a 47 days current coding streak with a maximum streak of 143 days, demonstrating consistency and dedication.

Education

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology — *Aug' 23 – Present*
Computer Science and Engineering: CGPA:8.03

Priyadarshani Jr. College — Pune, Maharashtra
Intermediate — *Aug' 20 – Mar' 23*
PCM; Percentage:83%

Cambridge International School — Pune, Maharashtra
Matriculation — *Aug' 20 – Mar' 21*
Percentage: 82.31%
